

Invitation: Green methanol

– sustainable fuel of the future

Danish petrol company OK is launching the first methanol fuel station in Europe together with Hamag, Serenergy and the Danish Energy Agency.

We hereby invite everyone with an interest in sustainable development of the Danish transport sector to join the opening and demonstration of the new tank installation.

By 2050, Denmark must be independent from fossil fuels, but the major question is; what is going to replace it? A number of Danish companies believe there is sense in using environmentally friendly, liquid fuels and thereby utilizing 100 years of experience from the existing infrastructure.

After the opening of the methanol fuel station, we invite everyone to join us for an event at Serenergy with presentations and demonstration of electric cars with built-in methanol-driven fuel cells. The vehicles are built in cooperation with Insero. You will have the opportunity to experience vehicles that are zero-emission and developed by a sustainable concept, and therefore have minimal impact on the environment. You will also have the opportunity to hear about green methanol and get an insight into the underlying technology. At Serenergy, we will also be serving refreshments.

Book the date and join us for an interesting event in Aalborg about groundbreaking Danish technology in the transport sector.

Registration no later than 20 August:

Anne Caroline Larsen, acl@serenergy.com

The event is free, but registration is necessary.

The final program for the day will be announced in week 32.

We are looking forward to seeing you for a day with launching of the new methanol fuel station and reception.

Date: 26 August 2015
Time: 10.00-14.00
Place: OK Service Station
Hobrovej 461,
9200 Aalborg SV

Serenergy A/S,
Lyngvej 8,
9000 Aalborg

PROGRAMME

10.00-10.30:

Opening of the methanol fuel station by Mayor of Aalborg Thomas Kastrup Larsen
Presentation and demonstration of the methanol tank installation at the service station.

11.00-14.00:

Reception at Serenergy A/S with refreshments

- Presentation and demonstration tour of Serenergy A/S
- Demonstration of methanol fuel cell driven vehicles.
- Brief presentations by Danish and international key actors from the methanol industry.
- Between the presentations, there will be time for mingling and refreshments.
